

Hyaluronic Acid Complex

Help to moisturize the skin

Multi-Layered Tech

4 types of hyaluronic acid complexes are indulged into each skin layer and provide more effective moisturizing.

Specialized in Skin moisturizing

Hyaluronic acid is an excellent moisturizing factor which helps to keep skin moist without irritation in a mild way.

Difference from other moisturizers

- Other : Temporary moisturizing effect and moisture evaporation inhibitory effect
- hyaluronic acid : Activates the extracellular matrix to increase the moisture content of the epidermis and dermis and sustain moisturizing effect.

* Limited to the characteristics of raw materials, Not the product itself.
